Description

The SolarCleanso M1 is a compact and efficient solution for cleaning solar panels and canopies. It has been developed so that a person can set it up and fully control it.

- The SolarCleanso M1 can be dismantled into 3 parts. The assembly is designed to be simple with few intermediate steps.
- The robot operates on a battery and is controlled from the ground via remote control.

The SolarCleanso M1 is effective on all types of solar panels or glass and is guaranteed for 12 months. The M1 is designed for smaller solar installations and glass canopies.

- The size of the brushes (0.80m) allows for thorough cleaning. To further improve the efficiency of the brushes, they are made up of 2 types of fibre and have a helicoidal shape, leaving no trace behind them.
- It can perform both wet and dry cleaning.
